AQUARIGHT BIO - FAST

**DESCRIPTION
AND USE**

AQUARIGHT BIO - FAST is highly specialized combination of bacterial cultures specifically selected and adapted to degrade a wide range of organic waste. This product has been used successfully in palm oil refineries, soy bean refineries, sugar refineries, dairy products, chemical plants, food and beverage processing plant, hotel & restaurants, etc.

It is proven to be effective to overcome a variety of problem such as periods of high influent loadings, system start up after mill shutdown and unfavorable temperature conditions.

This products is used to achieve consistent effluents with widely ranging influent organic levels, improve settleability of biological solids, reduce surcharges, control foam production from partially degraded organics and alter biomass, dynamics gradually shifting toward a superior population

**GENERAL
SPECIFICATION**

Ingredients List	CAS#	%
Water	7732-18-5	83.90
Non Oxynol 10	9016-45-9	5.00
Bacterial/Enzymes	9073-77-2	10.00
Fragrance	N/A	1.00
FDC Blue No. 1 (C142090)	3844-45-9	0.10
TOTAL		100.00

**TREATMENT
AND DOSAGE
REQUIREMENTS**

AQUARIGHT BIO - FAST is a multi purpose BIOLOGICAL CLEANER and DEODORIZER

AQUARIGHT BIO - FAST is normally dosed to the waste water feed line or collecting tank/basin.

Dosage will vary depending on the characteristic of influents, but recommended is 1 liter for 3 cubic meters of waste water per 3 months period.

**PRODUCT
BENEFITS**

Multi purpose Biological Cleaner and Deodorizer
Environmentally safe
Reduces COD/BOD
Low Cost
