## PRODUCT DATA

### ZEFATECH® SSP 32 (Stainless Steel Polishing Paste)

#### DESCRIPTION

ZEFATECH® SSP 32 Stainless Steel Polishing Paste is a blend of selected surfactants which are ethoxylated to ensure superior penetrating of the displaced organic particles (miscellaneous). These surfaces contaminants made up of fats, grease, burnt carbon, surface oxidation body and atmospheric pollution, etc are then literally dissolved away. Calcite Alloys and powdered silica of extremely fine particle size and mesh size then perform a deep leaning action.

This un-paralled penetrating cleaning action will rid surfaces of harmful bacteria and micro organisms. ZEFATECH® SSP 32 is finally homogenized to display without any damaging or dangerous side effects. Surface of Stainless Steel can be cleaned in a few minute, it is recommended for food processing equipment and even cutlery. A special food grade quality with silicone lubricant is also available as per special request.

#### METHOD OF USE

- Subject should be cleaned before from dirt or dust, grease, oil and other contaminants.
- Apply ZefaTech® SSP 32 on to surface area to be treated with a clean cloth meanwhile forced brush is working to removes any contaminants from the surface area.
- ZefaTech® SSP 32 can be added with some clean water in case of being rather hard/dried.

#### CHARACTERISTICS

Appearance & odor	: Blue Paste with pleasant odor
Specific Gravity	: 1.20 (approx)
Flash Point	: 90°C
Solubility in water	: Soluble

#### PACKING

: 500 Gram per Tube and 10 Tubes/Box
