

ZefaTech®

PRODUCT DATA

ZEFATECH® AS 103
Electric Contact Cleaner

**DESCRIPTION
AND USE**

ZEFATECH® AS 103 is a chlorinated hydrocarbon and flash suppressant solvent in aerosol/spray packing.

ZEFATECH® AS 103 generally use to clean and remove grease, dirt, carbon, dust, oil on electric tools and sensitive electronic like Panel, Terminal, Control Boards, etc.

ZEFATECH® AS 103 to clean oily surface from all kinds of alloys without washing off with because of quick evaporation and have no residue.

METHOD OF

Hold the ZEFATECH® AS 103's can by hand strongly and if it is needed put on its applicator pipe to reach the difficult area. Shake it regularly and strongly in a few times and make sure the squirted direction is right, from the distance approximately 6 to 10 inches.

Do it again if it is needed, so the tools are absolutely clean from carbon. After use it, turn back ZEFATECH® AS 103 can while squirted once or two times, to prevent the nozzle stagnation.
